
OFRH – ELITE OIL FILLED RADIATOR HEATER 2KW (OFRH)

The 2kW Oil Filled Radiator Heater has a built-in thermostat via which it maintains the room's temperature at your desired level.

With three output levels you can adjust the level of heat to match the weather and so if you don't need the full 2kW – saving energy. The unit will regulate itself with an internal thermostat so it will turn itself off once the required temperature has been reached. These efficient heaters are mounted on foot castors, and have carry handles to ease mobility. These are indoor electric heaters for home use, small offices, shops or workshops and use in conservatories.

KEY FEATURES
